

1. How have you noticed your bootcamp knowledge grow or change during Programming Basics?
 - a. I noticed that while writing my code that I don't have to think as much as I needed to at the beginning of this course. It just seems to go much smoother and feels more natural.
2. How have you noticed your approach to learning change throughout Programming Basics?
 - a. Implementing the 20-minute rule has been a huge help. I'm the type of person to sit and struggle with a problem for hours before getting help. But now, I just set a timer for 20 min once I realize that I'm struggling.
3. What do you consider your "Mistake of the Week," which was a failure you learned from during Programming Basics?
 - a. My mistake of the week was accidentally deleting a bracket within Trace that is part of the function that allows you to run code within it. It was such a simple mistake, but it hung everything else and caused me to seek help from the TA.
